Three major categories of leadership behavior are essential if a behavioral safety process is to be sustained and to accomplish its objectives. The behaviors derive from the work of Judi Komaki as reported in her text, Leadership from an Operant Perspective (1998). They form the basis for the development of checklists to measure the performance of each level of leadership.

How to Measure the Safety Leadership of Managers, Leaders ...

Leader influence is analyzed in terms of operant theory. The characteristics of leader-mediated stimuli and the way they are tied to the subordinate's newly exhibited and already acquired behavior are proposed as critical determinants of leader influence. Dependent parameters of leader influence on subordinate motivation and behavior acquisition are identified.

The operant conditioning or reinforcement theory of B. F. Skinner is one of the major psychological theories concerned with motivation at work. Unique in the social sciences, it identifies two of its major concepts according to the time at which they occur: (1) antecedents, such as communicating company policy, providing training, and setting goals, which [...]

Reinforcement Theory of Motivation - IResearchNet

This literature draws on a variety of definitions of social constructionism, multiple constructs, and an array of perspectives, approaches, and methods. To identify and understand the differences among them, this article provides a sailing guide, comprising four key dimensions, to the social construction of leadership.
