MCQs ON HEAT TRANSFER (Physics) with Answers

Access PDF Mastering Physics Answers Heat Transfer And

Shm

The transfer of heat energy by molecular and electron collisions within a substance (especially a solid).

Convection. The transfer of heat energy in a gas or liquid by means of currents in the heated fluid. The fluid moves, carrying energy with it. Radiation.

average kinetic energy increases. As these molecules collide with neighboring molecules having less kinetic energy, the energy is shared between these two groups.

Chapter Notes: Heat Transfer Physics Class11 - DronStudy.com

ANSWER: = Correct This is greater than

Acces PDF Mastering Physics Answers Heat Transfer And

Shm

the heat current due to only 2 rods. You would expect this to be the case since the effective surface area is increased by having a third rod. You can check that if you wanted to remove the third rod while keeping the same heat current, you must increase the cross-sectional area of the remaining two rods by a factor of 1.33.
